**Abstract of DE3326118**

Pyridopyrimidinetriones of the general formula I in which R<1> denotes a hydrogen atom or an alkyl group having 1 to 5 carbon atoms, R<2> denotes an alkyl group having 1 to 5 carbon atoms, R<3> denotes a hydrogen atom or an alkyl group having 1 to 3 carbon atoms, R<4> denotes a hydrogen atom, a halogen atom, an alkyl group having 1 to 4 carbon atoms, an alkoxy group having 1 to 4 carbon atoms or a trifluoromethyl group, R<5> denotes a hydrogen atom, a halogen atom, an alkyl group having 1 to 4 carbon atoms or an alkoxy group having 1 to 4 carbon atoms, their N-oxides and their acid addition salts are novel compounds. They have a hypotensive action. Processes for the preparation thereof and of the intermediates are given.
